Exchange for international students

Exchange for international students

Each year UFSC receives hundreds of reciprocal exchange students from our partner universities around the world. Exchange students are first selected and nominated to study at UFSC by their home universities. Once nominated, the student will receive an email with instructions to complete his/her application. Students whose home institutions do not have an exchange agreement with UFSC are not eligible to apply as exchange students.

Partner international institutions wishing to send students to UFSC must access the **online system** with their existing username and password in order to nominate their students. If your institution does not have a username and password yet, please send us a message at incoming.sinter@contato.ufsc.br.

International institutions that do not have a cooperation agreement with UFSC should consult the **procedures and criteria for submitting agreement proposals**.

Note: We inform that exchange in the Medicine Program at UFSC runs independently from SINTER and **does not accept students to attend theoretical courses**, only internships. Thus, students interested in doing internship in Medicine should contact the Program Coordinator directly (medicina.estagios@contato.ufsc.br). For further information, visit the program's **website**.

Note: Please be advised that the Undergraduate Program in Dentistry offers theoretical and theoretical-practical laboratory courses to students in international mobility at UFSC. The practical courses in the clinics are temporarily unavailable due to delays caused by the pandemic.
