# We Make a Difference

## Education for a Modern Citizen

A modern and globalising economy needs flexible professionals who can promptly adjust to new professional environments: new work spaces, new teams, new cities and even new countries. The educational programmes of HSE University — Saint Petersburg supply its graduates with the flexibility and soft skills to meet these challenges.

## Talent Development

The university is a center for talent. Talented students mentored by talented staff on inspiring programmes. Since 2014, HSE University — Saint Petersburg has implemented the “Major-Minor” and the “MagoLego” systems for each student: this broadens the mind, hones talent and challenges students’ abilities.

## Internationalisation Hub

We strive to become an international university with the highest standards of education, research, and internal culture. Students of HSE University — Saint Petersburg expand the geography of professional knowledge and obtain cross-cultural skills through an international curriculum, participation in international mobility and everyday communication with international students.

## Practical Skills for Dynamic Global Business

We think about the employability of our alumni for 2–5 years after graduation. We want to contribute to the human capital of our graduates and we consider their viability for fast-growing Russian and international companies. We are able to do this by integrating corporate partners’ courses into our programmes, we also organise masterclasses and guest lectures from top managers of Russian and international companies.

at HSE — Saint Petersburg

# Research

**Data Science for the Changing Society**

**Inequality and Governance**

**Humanities in the Knowledge Economy**

**Elena Shakina**

Deputy Director for Research and Academic Development, HSE University — Saint Petersburg

«Research at the HSE University — Saint Petersburg is a pillar of all academic and educational projects. We have built a unique expertise in humanities, social sciences, business and economics, physics, and computer sciences. We see our mission in generating a permanent impact on social, economic, and technological development of Russia and beyond. The recent advancements of the academic agenda of our campus are built around the integration of the research endeavours of leading international research centres, business partners, and young scholars across different disciplines.»

**Jacques-François Thisse**

Research Supervisor of the HSE Center for Market Studies and Spatial Economics, HSE University — Saint Petersburg; Professor of CORE, KU Leuven, Belgium

«It is not just teaching for me, it is an exchange of ideas. I learn too. It is two-way street and we exchange each other: I learn from young researchers and they learn from me. Generally, we work to develop the laboratory and make it better. Our main task is to enhance top-notch research in Russian economics on an international level.»
